HIGH-BENDING POSSIBILITIES

The FLEXIBLE B-T-B JUMPER from YAMAICHI Electronics offers the possibility of stepless bending far beyond a 90° angle. This allows the connection of printed circuit boards in almost any desired angle.

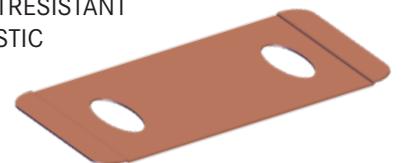

PICK & PLACE

PLATED CONTACTS

HEATRESISTANT
PLASTIC

SMT & TH REFLOW SOLDERING

Thanks to the heat-resistant Kapton film, the FLEXIBLE B-T-B JUMPER can be easily integrated into the reflow and SMT soldering process.

EASY ASSEMBLY

The FLEXIBLE B-T-B JUMPER can be optimally integrated into the Pic & Place process.

TAPE & REEL PACKAGING

The Tape & Reel Packaging makes it possible for the FLEXIBLE B-T-B JUMPER to be easily integrated into the production even with a high degree of automation.
